Current Projects include building a Children Cancer Center in Iran

Roya Foundation is developing a comprehensive children's cancer control programs in hopes of reducing the number of cancer cases and deaths.

Cancer is 2nd leading cause of death amongst children from 5 to 14. Only 40% of cancers are diagnosed and/or receive early and curative treatment each year!

Early diagnosis is the only way to give these children a chance at a normal life.

These programs strive to improve the quality of life for childhood cancer patients through evidence-based strategies for prevention, early detection, diagnosis, and treatment.
